Office Action Summary	Application No. 10/023,397	Applicant(s) MIET, GILLES	
	Examiner David D. Knepper	Art Unit 2654	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 December 2001.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-7 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-7 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 13 December 2001 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

1. Applicant's correspondence filed on 13 Dec 2001 has been received and considered. Claims 1-7 are pending.

Title

2. The title is objected to because it is too long.

Drawings

3. The drawings are objected to because the boxes do not contain descriptive names or abbreviations as required and the boxes are too small (figures 1-2). Correction is required.

Priority Claims

4. The applicant(s) should check their filing receipts and/or the Patent Application Information Retrieval (PAIR) system for the acknowledgment of their **domestic** priority or benefit claims (if any) under 35 USC 119(e), 120 or 121 (37 CFR 1.78).

Specification

5. The disclosure is objected to because of the following informalities:
Appropriate correction is required.
6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-3 and 5-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Goodman et al (Waveform Substitution Techniques for Recovering Missing Speech Segments in Packet Voice Communications) or Sanneck et al (A New Technique for Audio Packet Loss Concealment).

Goodman shows in figures 1-4 (page 106) that it is well known to store incoming data packets and when one is corrupt or missing to substitute a previous packet to replace the corrupt or missing data.

Similarly, Sanneck shows in figure 2 that it is known to store incoming data and to replace any lost packets with previous packets using overlap add calculations that will ensure accurate pitch alignment.

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 4 is rejected under 35 U.S.C. § 103 as being unpatentable over Goodman or Sanneck in view of Chen (5,717,822).

It is noted that Goodman or Sanneck does not explicitly teach the “adder of noise whose magnitude is based on the degree of correlation between the waveforms already passed”. However, Goodman teaches that his substitution is based on correlation using voicing and pitch (see abstract) and Sanneck explicitly teaches that his substitution will correlate waveforms based upon WSOLA algorithm (Waveform Similarity Overlap-Add) on page 49. In particular, Goodman teaches that it is known to use unvoiced substitutions for packets that are determined to be unvoiced (page 108) and Sanneck similarly teaches silence (page 50). Chen teaches that the modeling of unvoiced speech, silence, noise is done with an equivalent representation (col. 5, lines 32-35. It would have been obvious for a person having ordinary skill in the pertinent art, at the time the invention was made, to substitute noise for the unvoiced or silence taught by Goodman and Sanneck, respectively because Chen teaches that the three may be similarly modeled for accurate substitution of missing frames. Both Goodman and Sanneck teach that the resultant model will be added where the data went missing as previously noted above.

Prior Art

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The other prior art references are cited to show similar methods for substituting correlated packets for data that has been corrupted or lost.

11. Some correspondence may be submitted electronically. See the Office's Internet Web site <http://www.uspto.gov> for additional information.
